### Position Description
Reporting to the Director of Operations, the Technology Development Manager is responsible for overall management of CanAssist assistive technology efforts and related projects.

### Responsibilities include:
- Management of technology development programs including technology/product conception and project definition and development activities.
- Responsible for project progress tracking, updates and status reporting.
- Problem resolution, scope determination, and coordination of multiple stakeholders and partners’ interests are an integral component of this role.
- Supervise the day-to-day operation of the multi-disciplinary technology development team.
- Prepare proposals and estimates for new technology development projects.
- Assign staff to conduct assessments with clients, and install and support technologies for user testing purposes as identified by the Client Relations Coordinator.
- Drive adherence to technology development processes, such as a standardized gate process and other required design and development procedures.
- Set direction and desired outcomes and ensure that those assigned understand and are held accountable to achieve related obligations and deliverables.
• Under the leadership of the Director of Operations, collaborate with the Product Manager and Project Coordinator on project definition, project statements of success, project tracking and other activities as assigned.
• In partnership with the Executive Coordinator, recruit and hire employees and co-op students once approved by the Executive Director.
• Is accountable for efficient technical resource planning within the boundaries of acceptable resource utilization mandates.
• Communicate and educate the technology development team on priorities, project assignments, and CanAssist policies and procedures related to their responsibilities.
• As a member of the management team, participate in priority setting, strategic planning, budget preparation and resource allocation.
• Provide regular updates on engineering activities to the Director of Operations and the Executive Director highlighting progress, accomplishments and issues, and provide options to address any issues.
• Conduct/coordinate technology demonstrations and presentations.
• Lead the preparation of project-costing estimations.
• In partnership with the Communications Manager, coordinate technical writing of documentation and training materials.
• Ensure all regulatory requirements, both internal to UVic and external, are considered during the technology development cycle.
• Other duties as assigned.

Qualifications and Experience
• Preferably 3 to 5 years, or more, experience in managing technical teams in a rapidly changing environment.
• The ability to work effectively in a team environment and provide leadership regarding technology and product development matters is essential.
• A broad awareness and understanding of a variety of technologies across the disciplines of mechanical, electrical and software design, development and implementation.
• The ability to provide guidance regarding technology selection and application and appropriate insights into testing methodologies across a wide range of products and technologies will be advantageous.
• Experience and understanding of product development and standard design procedures is advantageous.
• A refined writing, speaking and presentation capability is an important asset.

Please submit a cover letter and résumé to Vicky Irvine, Executive Coordinator, by Tuesday, April 19, 2016 at 4:00 p.m. Applications may be submitted in person (CanAssist, CARSA, University of Victoria), by fax (250-721-7299) or via email attachments (vcirvine@uvic.ca).
